

**TEXAS BIOMEDICAL  
RESEARCH INSTITUTE**  
HEALTH STARTS WITH SCIENCE

**Texas Biomed is the only independent, nonprofit infectious disease research institute in the U.S. to combine:**

- The highest-level biocontainment labs for infectious disease and biodefense research
- A federally-designated National Primate Research Center
- More than 80 years of discoveries advancing diagnostics, vaccines and therapies
- An entrepreneurial culture and specialized expertise in regulated science required for FDA approval

**The results:**

Advanced the first COVID-19 vaccine, the first Ebola treatment, the first Hepatitis-C therapy, as well as many more developments and technologies – notably the high-frequency neonatal ventilator for premature infants
