

**TEXAS BIOMEDICAL
RESEARCH INSTITUTE**
HEALTH STARTS WITH SCIENCE

Science that Inspires.

Our Goal | Save millions of Lives from the Threat of Infection

Texas Biomed is America's only independent research institute with a fully integrated primate research center and the highest-level biosafety laboratories in the world on one campus. In an effort to save lives as fast as possible, Texas Biomed has combined its regulated, ethically-run resources with the expertise of 75+ PhD scientists to speed up the development of therapies and vaccines for some of the world's deadliest diseases.

For more than 75 years, Texas Biomed has been a reliable partner with organizations like the **National Institutes of Health, Department of Defense, Bill & Melinda Gates Foundation**, pharmaceutical companies and scientists worldwide to develop new ways to fight global health threats that are causing worldwide suffering.

With the ability to spread faster than ever before, infectious disease threats are growing. Global pandemics are real. Texas Biomed has tested several therapies and vaccines being administered today against hepatitis, Ebola, and COVID-19 and supported groundbreaking basic research on AIDS, malaria, tuberculosis and more.

A Revolutionary Campaign

Texas Biomed is focused on creating, building and staffing research services unlike any scientific operation today.

People | We are recruiting teams of top scientists with specific expertise in infection and dedicated to collaborative scientific approaches to the challenges of infectious diseases. Great minds working together equal great research outcomes.

Programs | We are designing and funding the support systems needed to ensure superior, cutting edge research and training of the next generation of biomedical researchers. By supporting rising scientists, we are creating a new generation of scientific thought-leaders.

Places | The Texas Biomed campus is being reimagined with thousands of square feet of new and renovated co-laboratory spaces to encourage collaboration and foster efficiency and safety.

Texas Biomed is redefining the way research can be done with less bureaucracy and more collaboration so that technologies, therapies and vaccines reach people around the world faster. **We are performing Science that Inspires.**

Funding the Vision

Our ability to defeat the disease threats of today and tomorrow depend upon more than the expertise of scientists. Success depends on visionary and courageous supporters investing in the health of our global community. Texas Biomed is looking to connect with partners to join with leaders across the world ready to invest in its life-saving research.
