

## **The International Center for the Advancement of Research and Education leverages the power of global exchange to solve complex health issues.**

### **Mission**

To identify, facilitate and strengthen national and international partnerships to improve human, animal and environmental health using Texas Biomed's lab-based science and education programs coupled with the expertise of its global partners.

### **About Us**

Texas Biomedical Research Institute (Texas Biomed) is one of the world's leading independent biomedical research institutions dedicated to eradicating infection and advancing health worldwide through innovative biomedical research. Texas Biomed was established in 1941, and for more than 80 years, the Institute's researchers have contributed scientific discoveries that have impacted millions of lives — from premature infants with the advent of the neonatal high frequency ventilator to the most recent development of COVID-19 vaccines.

Texas Biomed has strength in studying infectious diseases of global impact, including viral pathogens causing AIDS, hepatitis, hemorrhagic fever and influenza, as well as those causing tuberculosis (TB) and parasitic diseases responsible for malaria and schistosomiasis.

---

### **I-CARE:**

- Capitalizes on the power of Texas Biomed's longstanding international partnership portfolio while also growing a global hub to advance infectious disease research and create opportunity for educational exchange.
- Enables researchers to apply their discoveries in the laboratory to human- and animal-based studies outside the lab and collaborate in the development of new applied research projects and clinical trials.
- Facilitates identification of best practices in communities, including cost-effective evaluation of disease prevention and treatment strategies.
- Creates a robust infrastructure for collaborative education efforts, serving as an educational platform for next generation scientists.

---

### **Help us CARE for each other.**

I-CARE is based at Texas Biomed, a 501C3 nonprofit dedicated to protecting you, your family and our global community from the threats of infectious diseases. I-CARE is supported by research grants, partnerships and philanthropists who believe in the power of community to impact human health on a worldwide scale.
